## PROFESSIONAL SUMMARY

Full Stack Engineer with hands-on experience building and optimizing modern web applications using Next.js, React, and Node.js. Proven ability to deliver high-performance, scalable platforms across travel, media, e-commerce, and content domains. Skilled in end-to-end development — from architecture and server-side rendering to APIs, performance optimization, and production-ready deployments. Strong focus on clean code, Core Web Vitals, technical SEO foundations, and creating reliable user experiences that scale.

## TECHNICAL SKILLS

**Frontend:** Next.js (SSR, SSG, ISR), React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Emotion, Responsive Design

**Backend & Full Stack:** Node.js, REST APIs, Dynamic Routing, Authentication flows

**Performance & Architecture:** Core Web Vitals optimization, Image optimization, Caching strategies, System architecture

**Analytics & Technical SEO:** Google Analytics 4 (GA4), Google Search Console, Technical SEO, Structured Data, Indexing Strategy

**Tools & Platforms:** Git, GitHub, Vercel, PageSpeed Insights, VS Code, Docker, Supabase, AWS, OnRender

**Databases:** MongoDB, Redis, CDNs

## PROFESSIONAL EXPERIENCE

### Creative Volt

Feb 2026 – Present

Full Stack Engineer

Sahibzada Ajit Singh Nagar, Punjab

- Own end-to-end development and maintenance of multiple high-traffic platforms (FHMNews.com, Tripxpedia.com, TheBusinessClassFly.com) using Next.js — handling architecture, performance, and feature delivery.
- Architected clean, scalable URL structures, dynamic routing, and efficient data-fetching patterns to support fast page loads and reliable user experiences.
- Optimized project folder architecture and routing strategy to enable efficient indexing of 21,000+ articles on FHMNews.com while maintaining strong Core Web Vitals.
- Implemented performance optimizations (image optimization, code splitting, caching, and Core Web Vitals improvements) that significantly improved load times and user engagement metrics.
- Set up and leveraged Google Analytics 4 (GA4) to track user behavior, measure performance improvements, and guide data-driven product decisions.
- Collaborated closely with stakeholders to translate product requirements into production-ready full-stack solutions.

### Flyhead Media

Jul 2025 – Feb 2026

Frontend Developer

Gurugram, Haryana

- Developed and optimized multiple client-facing websites using Next.js best practices (SSR, image optimization, code splitting, and efficient data fetching).
- Improved Core Web Vitals and overall page performance across projects, resulting in faster load times and better user experience scores.
- Implemented modern frontend architecture, reusable component libraries, and responsive designs focused on maintainability and scalability.
- Worked on technical integrations including meta management, structured data readiness, and mobile-first experiences.

## Flyhead Media

Web Development Intern

Apr 2025 – Jul 2025

Gurugram, Haryana

- Contributed to frontend development tasks, performance audits, and component-level improvements on live client projects.
- Assisted in implementing responsive layouts, basic performance fixes, and clean code practices under senior developer guidance.

## KEY PROJECTS

---

### Tripxpedia | Full-Stack Online Travel Agency Platform

- Built a complete digital-first Online Travel Agency (OTA) platform enabling users to search, compare, and book flights, hotels, and vacation packages across 120+ destinations.
- Implemented core full-stack features including real-time search flows, user dashboards, booking management, and responsive UI using Next.js.
- Applied technical SEO best practices (clean URL structure, meta optimization, and performance-focused architecture) to improve organic discoverability of travel content.
- Focused on clean architecture, performance optimization, and scalable component design to support a production-grade travel booking experience.

### TheBusinessClassFly | Premium Travel Booking Platform

- Developed a specialized premium flight booking platform focused on Business and First Class inventory with transparent pricing and personalized booking flows.
- Handled frontend architecture, performance tuning, and integration of dynamic content to deliver a high-end user experience.
- Incorporated technical SEO foundations and conversion-focused page structure to support better visibility for high-intent luxury travel keywords.

### FHMNews | Automated News & Content Platform

- Designed and built a fully automated news aggregation and publishing platform using Next.js with efficient data fetching and dynamic content delivery.
- Optimized project file/folder architecture and routing strategy to efficiently support indexing of 21,000+ articles while maintaining strong performance and crawlability.
- Architected the system for high-volume content handling, fast page generation, and reliable performance at scale.
- Integrated Google Analytics 4 (GA4) for tracking content performance and user engagement across the platform.

### Socioglamm | Social Commerce Platform (Next.js)

- Developed a dual-module social + e-commerce platform where users can shop, post content, tag brands, and earn rewards.
- Leveraged Next.js SSR, dynamic routing, and performance-focused architecture to deliver a scalable and responsive experience.
- Built reusable components and clean folder structure to support rapid feature development and maintainability.

### Carsnbike | Automotive Listing Portal

- Created a full-featured automotive listing website with location-based pages, blog CMS, and structured content architecture using modern web technologies.

## EDUCATION

---

### Galgotias University

Bachelor of Technology, Computer Software Engineering

Oct 2021 – May 2025

Greater Noida, UP

### Gyan Niketan School

Mar 2020 – Mar 2021

Intermediate (Mathematics and Computer Science)

Patna, Bihar

### Gyan Niketan School

Apr 2018 – Mar 2019

Matriculation

Patna, Bihar
